Summary

Dynamic and self-motivated software engineer with over 8 years of experience, known for bringing enthusiasm and positivity to the workplace. Proven track record of enhancing team morale and fostering a collaborative, vibrant company culture while delivering high-quality technical solutions.

Technology Proficiencies

CSS | HTML | JavaScript | React | CSS in JS | Git
APIs | Redux | TypeScript | Agile Methodologies

Experience

Blue Bite - Senior Full Stack Engineer   Jan 2023 – Jan 2024
- Provided visual design ideation, feedback, and conceptualization resulting in successful delivery and release of three major features for product redesign within two fiscal quarters
- Participated in CI/CD processes using Git, AWS and Docker for deployment
- Partnered with marketing, product, design, and QA to translate functional requirements into user stories and technical designs focused on scalability
- Executed unit and integration testing resulting in 90% test coverage using Jest and React Testing Library
- Learned Node.js, Knex, and PostgreSQL to execute two backend migrations in a single sprint
- Implemented and maintained internal design system using React, Typescript, and Storybook

Bottle Rocket - Senior Software Engineer   Oct 2017 – Dec 2023
- Led distributed development team through end-to-end customer-facing site redesign following new brand guidelines while navigating communication challenges with a siloed team
- Collaborated with product, design, and other engineers to design and develop engaging user experiences for e-commerce, travel, and enterprise web software
- Ideated, designed, and developed enterprise data visualization web application to track and analyze supply chain & logistics metrics and more closely track revenue KPI's resulting in a 20% increase in order processing efficiency over 2 fiscal quarters
- Participated in the mentorship of less experienced developers to improve overall code quality and adherence to best practices, 100% of whom were retained 2 years after hire and received promotions into senior developer roles

Buzz Points - Front End Developer   Feb 2016 – May 2017
- Built and deployed web-based tools for banks, merchants, and clients to manage revenue, sales, and other features of the Buzz Points system
- Successfully discovered, tested and released React Native MVP cross-platform application over 3 project sprints
- Collaborated with cross-functional engineering team to design and develop new features for a web-based interface including product integration with Visa API
- Chairperson of Buzz Points Culture Committee for 2017
